SUMMARY

I'm a continuous learner, with a passion for front-end web technologies. I'm naturally observant and attentive to detail. With my background in hairdressing, I know how to collaborate with a client to refine their ideas and ensure that they get the result they are looking for and I take that same approach into web development.

PORTFOLIO

3D Game - Space Wars

A two player game competing over taking the most resources first. Incorporates texture mapping, generation of game objects, and particle effects. Built using babylon.js, HTML5, and CSS.

Full stack Movie Catalog Website

Used TMDb API to query selected data about movies. Created a user login, and preferences selection for a user to select favorite genres, and a watchlist page where a user could store their selected movies. developed in a team with two other classmates using JavaScript, Node.js, CSS, EJS, MongoDB, and Express

2D Game - Avoid the Windows

An avoiding obstacle game that incorporates collision detection, animation, score and health tracking. Developed mainly using HTML5 Canvas and JavaScript.

Restaurant Website Coded & Tested

Built a restaurant POS system based on a requirement document. Made wireframes and user stories. Coded in JavaScript, HTML, and CSS. Designed and documented test cases. Executed the tests via manual testing.

EDUCATION

General Assembly, Chicago, IL

600+ Hour Full Stack Web Development Program

Focused on learning best practices in object-oriented programming, MVC frameworks, front-end frameworks, building and using APIs.

3/2018

Per Scholas, Bronx, NY

300+ Hour Software Testing Training Course in partnership with Tech Talent Pipeline

Focused on learning software development and testing methodologies, as well as programming fundamentals.

9/2017

Santa Barbara City College, Santa Barbara, CA

Cosmetology Academy

11/2013

WORK EXPERIENCE

Hairstylist, **Kolorbar**, Manhattan, NY

12/2016 - 3/2017

Hairstylist, **The Color Room**, Santa Barbara, CA

11/2013 - 3/2016

SKILLS & TOOLS

Programming Languages & Technologies:

HTML

JavaScript

Ruby

Css, Ejs

Canvas

AngularJS

MongoDB

PostgreSQL

jQuery, Ajax, Node

Tools:

Git / GitHub

WebStorm

Jira

QA & Methodologies:

SDLC

Manual testing

Regression testing

Creating test plans and cases
