SUMMARY

I'm naturally observant and attentive to detail. I enjoy open collaboration and gaining different insights and perspectives to incorporate ideas into my work.

PORTFOLIO

Full stack Fashion Catalog Service (*Link*)
In partnership with a classmate, created an application that allows the registered users to upload images from other web pages and save them along with their source url and a color tag. Created using React, Sinatra, and Express.

Full stack Movie Catalog Website- (*Link*)
Used TMDb API to query selected data about movies. Created user login, and preferences selection for user to select favorite genres, and a watchlist page where user could store their selected movies. Created in a team with two other classmates using JavaScript, Node.js, CSS, EJS, MongoDB, and Express

2D Canvas Game- (*Link*)
An avoiding obstacle game that incorporates collision detection, animation, score and health tracking. Created mainly using HTML5 Canvas and JavaScript.

Restaurant Website Coded & Tested- (*Link*)
Created a restaurant POS system based on a requirement document.
Made wireframes and user stories. Coded in JavaScript, HTML, and CSS.
Designed and documented test cases. Executed the tests via manual testing.
