SUMMARY OF QUALIFICATIONS

An emerging QA Software Tester, who possesses solid understanding of theoretical and practical aspects of software testing, with fundamental programming knowledge. Naturally observant and detail oriented. Works well in a team environment. *Key Strengths:* Highly organized. Effective writing and documentation skills.

PORTFOLIO

Website Coded in HTML, CSS, & JavaScript - (Link)
Wrote a Requirement Document based on stakeholder specifications. Used agile methodology to sketch, design, and code a restaurant POS system website.

Complete Test Plan and Test Case On Website
Gathered user acceptance criteria based on requirement document, usability, and functionality. Designed and documented test cases using Jira. Executed the tests via manual testing. Fixed bugs in code then regression tested.

Web Calendar Coded in HTML & CSS– (Link)
Coded to gain the fundamentals of static web design.

10 Projects Based in Python – (Link)
Coded to gain the fundamentals of functional programming.

MySQL Database
Created a database for a pet store with pet and customer information. Used Excel Spreadsheet to add client and pet information into database.

EDUCATION

Per Scholas, *Bronx NY*   *9/2017*
Software Testing Training Course in partnership with Tech Talent Pipeline

City College, *Santa Barbara CA*   *11/2013*
Cosmetology Academy

WORK EXPERIENCE

Hairstylist, **Kolorbar**, *Manhattan, NY*   *12/2016 - 3/2017*

Hairstylist, **The Color Room**, *Santa Barbara, CA*   *11/2013 - 3/2016*

SKILLS & TOOLS

Software Testing Skills:

SDLC

Defect lifecycle

Defect management

Manual testing

Automated testing

Regression testing

Creating test plans and cases

Creating requirement documents

Documentation in Jira

Programming Languages:

HTML

CSS

JavaScript

Python

MySQL

Testing & Coding Tools:

Selenium

Jira

Q-Test

Git / GitHub

WebStorm

PyCharm

MySQL Workbench
